

Discovery Science Place Mobile STEM Lab

HANDS-ON ACTIVITIES

Engaging labs and activities designed to excite students and provide them the opportunity to interact with meaningful technology.

ALIGNED CURRICULUM

Labs and activities are aligned to current state and national standards. Custom activities can be created to match your current content and grade level.

HIGHLY-QUALIFIED TEACHERS

The Mobile STEM Lab is staffed by our museum education director- certified to teach all aspects of science curriculum from 6th through 12th grade levels.

BASIC COSTS

Cost: \$600-\$1200/class day (dependent on distance and travel requirements) w/an average price of \$795

The DSP Mobile STEM Lab allows a campus/district to have access to technology and equipment not readily available to many. In lieu of using scarce funds to purchase equipment that experiences valuable (but limited) use throughout the year, districts can make use of those dollars for a targeted, hands-on learning event. The Mobile STEM Lab provides engaging and meaningful experiences that bring learning to life, and does so in a budget-conscious manner.

- Hands-on activities to excite and engage middle and high-school students
- Curriculum support aligned with state and national standards
- Access to innovative equipment and technology at a fraction of the purchase cost
- Access to experienced and highly-qualified teachers and presenters
- Learning activities covering a wide variety of grade levels and science topics

In addition to equipment and technology the DSP can provide support from a science curriculum development team including former public-school teachers and current university personnel certified in all science disciplines at both the middle and high school levels. The amount of curriculum support can be tailored to the needs of the campus or the particular project goal.

The mobile lab may be contracted for various time-frames, from a few hours to multiple days and may serve multiple classes per day. Basic pricing information is attached, but may be affected by participation in various national and state grants. Contact the Discovery Science Place for further details.
